

Flood and Coastal Risk Survey

We are seeking your views on local flood and drainage issues to inform the development of the future programme of flood and coastal risk management works within the East Riding.

Since 2007, East Riding of Yorkshire Council has completed an extensive programme of works to reduce the risk of flooding, delivering the largest local authority capital programme for flooding and coastal risk management in England. Details of schemes we have delivered can be found on our web page (see web address below). In order to identify future sites that might be at risk of flooding, we wish to gather the views of our local communities. Please feel free to discuss this survey in your communities before responding to it.

Feedback from the survey will allow East Riding of Yorkshire Council to undertake initial investigations to determine potential impacts of risk, costs of works and available funding opportunities. We would be grateful for a response by Friday 31 August 2018.

More information on our Flood Risk Strategy, including completed works and developing schemes, can be found www.eastriding.gov.uk/flooding.

If you have any queries, our contact details are:

Astrid Paget
Flood Risk Strategy (AS67)
East Riding of Yorkshire Council
